## Jesus Diez del Corral: The Spanish Botvinnik

Juan Carlos Sanz Menéndez - Jesús Diez del Corral: El Botvinnik español- frontcover

Mr Juan Carlos Sanz Menéndez has just published in Spanish, Jesús Diez del Corral: El Botvinnik español, about the second Spanish grandmaster, covering his entire chess career from 1945 to 1988, with over 1000 games, the vast majority of which do not appear in game databases. It is available from the specialist chess publisher Tienda Chessy: [DIEZ DEL CORRAL El Botvinnik español](#)

Description:

Book including all the games of Diez del Corral, the 2<sup>nd</sup> Spanish Grandmaster in history and one of the most talented. Covers his entire chess career, from 1945 to 1988.

This work is the result of a titanic effort by the author, who has endeavoured to bring together almost all the games played by one of the most talented Spanish grandmasters (and surely also one of the most professional in his preparation).

Not only is it a journey through Diez del Corral's chess career, but it is also a look at the leading Spanish masters of the time, who in most cases held the title of National Master by being placed prominently in the national championships. These now unknown players were among the strongest in Spain and with this work we make them known, with a brief biography.

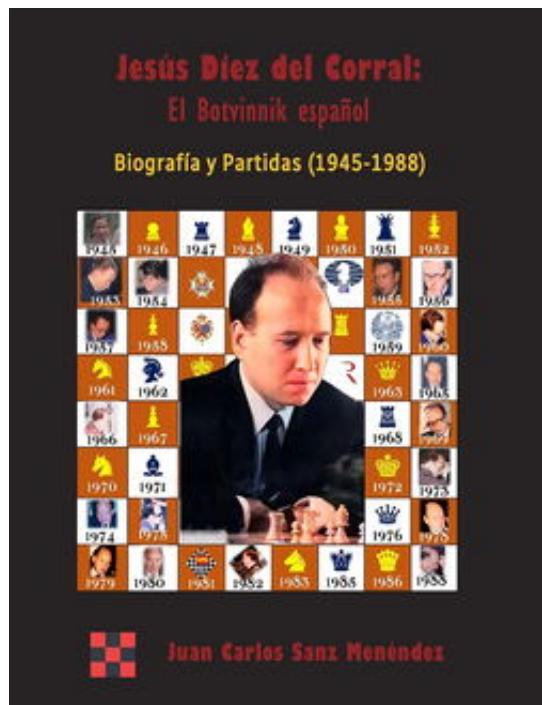

Jesús Diez del Corral (1933-2010) was for more than a decade (from 1968 to 1979) the strongest player in Spain, although he had to combine chess with his demanding professional obligations (he was a land

register and notary, for example).

Juan Carlos Sanz Menéndez
