Margus Sööt first junior member of the KWA

We are pleased to welcome the first junior member of our association, **Margus Sööt** from the Estonian capital Tallinn.

Margus Sööt, a former basketball player of good 2 m size, deals meanwhile with all facets of chess and has also turned out as an industrious author. He is particularly partial to endgame studies and runs the study section in the Swedish problem magazine [Springaren](#).

As an engineer geologist he works in an engineering office in Tallinn.

Below two photographs from his visit to Cologne in 2007.
