The work reflects the result of 25 years of collecting with focus on chess scenes and chess illustrations in German literature, from the baroque period until the year 2016. 10 Titles from the 16<sup>th</sup> century, about 55 from the 17<sup>th</sup>, 100 from the 18<sup>th</sup> and 280 from the 19<sup>th</sup> century are included. But also many other languages than German are present in the collection. This applies especially to an important topic of the collection: Stefan Zweig's "Schachnovelle", a story of which Mr Schönlé has tried to collect as many editions in as many languages as possible even if this would only remain a target. For those interested: the entries 3811 to 4372 are Schachnovelle-editions and associated secondary literature.

About 600 English language works and translations are included.

Other special topics in the collection are works on the Chess Automaton of Baron von Kempelen (The Turk), crime stories, and art related books and catalogues. Lexicons, bibliographies and other works of reference were gradually added over the years.
